Art Unit: 1632

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1, 2 and 17-42 drawn to a GGTA1 null swine, a porcine GGTA1 null cell, a porcine organ lacking expression of galactose- α (1,3)-galactose epitopes, porcine tissues lacking expression galactose- α (1,3)-galactose epitopes and methods of creating a GGTA1 null swine.

Group II, claim(s) 3-16 and 43, drawn to a method of selecting GGTA1 null cells comprising obtaining a line of cells obtained from a GGTA1 heterozygous pig or fetus, enriching the cells for GGTA1 null, and scanning the line for viable GGTA1 null cells.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: U.S. Patent 6153428, issued November 28, 2000, claims porcine cells comprising a disruption of the α -1,3-galactosyltransferase gene (see claims 1-5). Thus, the groups I and II lack a special technical feature as GGTA1 null porcine cells were known at the time of filing.

Applicant is advised that the reply to this requirement to be complete must include

(i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1632

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
